

WOODHOUSE Performance

Woodhouse Wheel Studs – Exclusively from Woodhouse. Wheel studs with an additional 1 ½ inches of length plus an extended taper which eliminates cross threaded bolts. Car Set. Price: \$360.50

Stock Wheel Bearings: OEM quality wheel bearing. Frequently a neglected part on a race car.

Front Bearing: \$294.58
Rear Bearing: \$358.62

Special: 4 bearing/stud Assemblies \$1690 (Price includes labor)

Woodhouse Tow Hooks: Detachable tow hooks exclusively from Woodhouse Performance. Meets all FIA requirements, installs in 30 minutes, eye and spindle detach to preserve your Viper's sporty aesthetic. Price: \$220

Woodhouse Motor and Transmission mounts: Custom Woodhouse Performance motor and transmission mounts replace stock mounts without modification. Reduce missed shifts, increase exhaust life, and decrease suspension interference induced by engine vibration. A necessary basic upgrade to anyone wanting to race competitively.

Motor mounts: \$249
Transmission mounts: \$41.60

WOODHOUSE *Performance*

Woodhouse Frictionless Ball Joints: Stock viper ball joints carry friction loads that interfere with suspension movement and ride quality. These ball joints available exclusively from Woodhouse Performance will ensure a greater level of compliance from your suspension.
Price: \$91

Lamin-X Protective Film – Protect your Viper with Lamin-X film covers. Made of tough optical quality film they resist cuts, scratches and breaking. Clear, yellow, blue and gunmetal available.

Price: \$69.95

Lamin-X Protective Film

Race-Logic/Traction Control

Race-Logic Traction Control - Arguably the best traction control system for the money. Uses throttle cuts to control wheel spin allowing for faster power delivery. Programmable launch control as well. There are many variables that contribute to the price of this product. Call for pricing.

Emco Gears DV46 Racing Transmission: The DV46 6-speed sequential gearbox is a direct bolt in for the Dodge Viper as well as any vehicle that comes equipped with a T-56 or T-6060 Tremec.

Features:

- Ground gear sets.
- Precision dog clutch shifting.
- Filtered circulating lubrication system.
- Optional sensor set for shift-without-lift implementation
